

Aayush Garg

Software Engineer | Full-Stack Developer (MERN) | Problem Solver

Mathura, Uttar Pradesh, India | [Email](#) | +91 9456053071

[LinkedIn](#) — [GitHub](#) — [LeetCode](#)

Professional Summary

Software Engineering student with hands-on experience building full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and SQL/MySQL. Experienced in REST APIs, JWT authentication, role-based authorization, and responsive React interfaces. Familiar with Git/GitHub, Docker, and CI/CD using GitHub Actions.

Education

Ajay Kumar Garg Engineering College (AKGEC)

Bachelor of Technology in Computer Science and Engineering

Aug 2024 – May 2028

Ghaziabad, Uttar Pradesh, India

Technical Skills

Programming Languages: Java, JavaScript, SQL, C

Frontend Development: React.js, HTML5, CSS3, Responsive Design, Component-Based Architecture

Backend & Database: Node.js, Express.js, MongoDB, MySQL, REST API Design

Full Stack & Auth: MERN Stack, JWT Authentication, Password Hashing, Role-Based Authorization, API Integration

Tools & DevOps: Git, GitHub, Docker, GitHub Actions, CI/CD, VS Code, Vite, npm

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, Problem Solving, Time & Space Complexity

Projects

Okla

[Project Link](#) | *MERN Stack*

- Developed a full-stack LMS with modular architecture covering authentication, courses, sections, lessons, enrollments, progress tracking, and reviews.
- Implemented JWT authentication, password hashing, role-based authorization, and validated REST API workflows.
- Built workflows for student enrollment, lesson completion, progress tracking, reviews, and rating aggregation.
- Structured the backend with feature-based modules containing models, validation, services, controllers, and routes for maintainability.

FlashMart

MERN Stack

- Built a full-stack flash sale platform using React.js, Node.js, Express.js, and MongoDB with a scalable application architecture.
- Implemented interactive features including countdown timers, promotional banners, product displays, REST APIs, and database integration.
- Applied responsive design and clean UI/UX practices while structuring the application for maintainability and scalable backend workflows.

Achievements

- Completed a modular MERN-based LMS backend covering authentication, course management, enrollments, progress tracking, and reviews.
- Built multiple hands-on web development projects using React.js, JavaScript, REST APIs, and modern development workflows.
- Consistently strengthened algorithmic problem-solving through Java-based Data Structures and Algorithms practice.

Development & Problem Solving

- Strengthened analytical skills through continuous implementation of Data Structures and Algorithms in Java.
- Solved coding challenges involving optimization, debugging, edge cases, and time/space complexity.
- Developed responsive applications using React.js, JavaScript, HTML, and CSS with clean, maintainable practices.
- Built foundational SQL and MySQL skills for working with structured application data.
- Learning Docker containerization and CI/CD automation with GitHub Actions for reliable software delivery.

Coding Profiles & Practice

- Practice Data Structures, Algorithms, and problem solving on LeetCode to improve algorithmic thinking and solution efficiency.
- Focus on constraint analysis, edge-case handling, and selecting efficient time and space complexity for practical solutions.

Interests

Software Development, Full-Stack Development, UI/UX Exploration, Cricket, Table Tennis
